**Answer :**

Explanation:

Explanation

Box 1: Install a self-hosted integration runtime  
The Integration Runtime is a customer-managed data integration infrastructure used by Azure Data Factory to provide data integration capabilities across different network environments.

Box 2: Create a pipeline  
With ADF, existing data processing services can be composed into data pipelines that are highly available and managed in the cloud. These data pipelines can be scheduled to

ingest, prepare, transform, analyze, and publish data, and ADF manages and orchestrates the complex data and processing dependencies
