NEW QUESTION: 2

How many hash buckets does Cisco Express Forwarding use for load balancing?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

In order to understand how the load balance takes place, you must first see how the tables relate. The Cisco Express Forwarding table points to 16 hash buckets (load share table), which point to the adjacency table for parallel paths. Each packet to be switched is broken up into the source and destination address pair and checked against the loadshare table.
