**NEW QUESTION: 2**

The following description of the AIX system command is incorrect:

- A. To check whether the UltraPath is installed successfully: `#lslpp -l UPforAIX *`
- B. To check the WWN number of the HBA: `#lscfg -pvl fcs0`
- C. To modify the network card IP address: `#lsdev -Cc if`
- D. To check the disk is recognized correctly: `#lsdev -Cc disk`

**Answer: A**

**NEW QUESTION: 3**

You notice that during peak hours, some firewall enforcers contain a high number of auth table entries. As you investigate the issue, you discover that all users are getting auth table mappings to all firewalls, which is not acceptable.

What should you do on the Junos Pulse Access Control Service to resolve this problem?

- A. Create Source Interface policies that route users to specific resources
- B. Create auth table mapping policies that route users to specific resources
- C. Delete the default auth table mapping policy
- D. Create Resource Access policies that permit access to specific resources

**Answer: C**
