So it is very important for a lot of people to gain the HPE2-W09 certification, Meticulous experts, Buolkab HPE2-W09 After all, no one can steal your knowledge.

How can I apply for HP HPE2-W09 Certification Exam, This 57-hour collection is divided into three sections, The HPE2-W09 free pdf demo support to be printed, while if you want the HPE2-W09 test simulator for reference, we can provide you the screenshot about the practice format.

At the time when people are hesitating about which kind of HPE2-W09 study material to choose, I would like to recommend the training materials of our company for you to complete the task.

As you know, in most cases, people [AWS-Advanced-Networking-Specialty Reliable Test Cram](#) achieve success because they size up the situation.

**NEW QUESTION: 1**
SIMULATION
Click to expand each objective. To connect to the Azure portal, type https://portal.azure.com in the browser address bar.

When you are finished performing all the tasks, click the 'Next' button.
Note that you cannot return to the lab once you click the 'Next' button. Scoring occur in the background while you complete the rest of the exam.
Overview
The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab

You may start the lab by clicking the Next button.

You plan to back up all the Azure virtual machines in your Azure subscription at 02:00 Coordinated Universal Time (UTC) daily.

You need to prepare the Azure environment to ensure that any new virtual machines can be configured quickly for backup. The solution must ensure that all the daily backups performed at 02:00 UTC are stored for only 90 days.

What should you do from your Recovery Services vault on the Azure portal?

**A.** create a backup schedule

C1. Open the Microsoft Azure Backup agent. You can find it by searching your machine for Microsoft Azure Backup.

C2. In the Backup agent's Actions pane, click Schedule Backup to launch the Schedule Backup Wizard.

C3. On the Getting started page of the Schedule Backup Wizard, click Next.

C4. On the Select Items to Backup page, click Add Items.
The Select Items dialog opens.

C5. Select Blob Storage you want to protect, and then click OK.

C6.In the Select Items to Backup page, click Next.
On the Specify Backup Schedule page, specify
Schedule a backup every: day
At the following times: 2.00 AM

C7. On the Select Retention Policy page, set it to 90 days, and click Next.

C8. Finish the Wizard.

**B.** Task A: Create a Recovery Services vault (if a vault already exists skip this task, go to Task B below) A1. From Azure Portal, On the Hub menu, click All services and in the list of resources, type Recovery Services and click Recovery Services vaults.

If there are recovery services vaults in the subscription, the vaults are listed.

A2. On the Recovery Services vaults menu, click Add.

A3. The Recovery Services vault blade opens, prompting you to provide a Name, Subscription, Resource group, and Location Task B.

B1. On the Recovery Services vault blade (for the vault you just created), in the Getting Started section, click Backup, then on the Getting Started with Backup blade, select Backup goal.

The Backup Goal blade opens. If the Recovery Services vault has

been previously configured, then the Backup Goal blades opens when you click Backup on the Recovery Services vault blade.
B2. From the Where is your workload running? drop-down menu, select Azure.
B3. From the What do you want to backup? menu, select Virtual Machine, and click OK.

B4. Finish the Wizard.
Task
**C.** create a backup schedule
C1. Open the Microsoft Azure Backup agent. You can find it by searching your machine for Microsoft Azure Backup.

**NEW QUESTION: 2**
Which of the following is the MOST important reason to classify a disaster recovery plan (DRP) as confidential?
**A.** Comply with business continuity best practice.
**B.** Protect the plan from unauthorized alteration.
**C.** Ensure compliance with the data classification policy.
**D.** Reduce the risk of data leakage that could lead to an attack.
**Answer: D**

**NEW QUESTION: 3**
You administer a Microsoft SQL Server 2012 server that hosts a transactional database and a reporting database. The

transactional database is updated through a web application and is operational throughout the day. The reporting database is only updated from the transactional database.
The recovery model and backup schedule are configured as shown in the following table: One of the hard disk drives that stores the reporting database fails at 16:40 hours.

You need to ensure that the reporting database is restoreD. You also need to ensure that data loss is minimal.
What should you do?
**A.** Restore the latest full backup. Then, restore each differential backup taken before the time of failure from the most recent full backup.
**B.** Restore the latest full backup. Then, restore the latest differential backup.
**C.** Perform a partial restore.
**D.** Restore the latest full backup, and restore the latest differential backup. Then, restore the latest log backup.
**E.** Restore the latest full backup.
**F.** Perform a point-in-time restore.
**G.** Perform a page restore.
**H.** Restore the latest full backup, and restore the latest differential backup. Then, restore each log backup taken before the time of failure from the most recent differential backup.
**Answer: E**
Explanation:
Original answer is H... but I don't particularly like any... restore full on reporting and run update again or use transactional full and 2 O'clock differential from Transaction db to restore the reporting dB. I'm going for something missing from question or answer
