function.
**Answer: A,C**

**NEW QUESTION: 4**
You need to specify the correct artifacts to use in a
SharePoint 2010 application for a school district. The
school
district's administrator needs to be able to search for student
information on an intranet SharePoint 2010
portal.
Student information is currently available in another database,
which supports an Open Database
Connectivity
(ODBC) driver. You need to design the solution to meet the
following requirements:
*Provide a user interface to search for a student based on
name.
.Enable the administrator to select the correct student name
from the search results.
.Provide a student header section that displays the primary
student identity information, which will enable
the
administrator to correlate any new information with the correct
student.
.Provide additional data entry pages to add or update
additional student information.
Which approach should you recommend?
**A.** Design a user control and load this control in a Web Part to
search for a student. Then render the student details in a

SharePoint page.
**B.** Design a Web Part to search for a student. Then render the student record details in a SharePoint page.
**C.** Design connected Web Parts to share information among search data entry, student header information, and new data entry information Web Parts.
**D.** Design HTML Web pages to render the student details. Install these pages under the /templates/ _layouts/1033 folder and load these pages in Web Parts.
**Answer: C**
