**NEW QUESTION: 3**

A new e-mail virus that uses an attachment disguised as a picture file is spreading rapidly over the Internet.

Which of the following should be performed FIRST in response to this threat?

- A. Block all e-mails containing picture file attachments
- B. Quarantine all picture files stored on file servers
- C. Quarantine all mail servers connected to the Internet
- D. Block incoming Internet mail, but permit outgoing mail

**Answer: A**

Explanation:

Explanation

Until signature files can be updated, incoming e-mail containing picture file attachments should be blocked.

Quarantining picture files already stored on file servers is not effective since these files must be intercepted before they are opened. Quarantine of all mail servers or blocking all incoming mail is unnecessary overkill since only those e-mails containing attached picture files are in question.
