NEW QUESTION: 1

Identify two correct descriptions of Oracle Web Services Manager (OWSM).

- A.** It uses Oracle Event Processing (OEP) to determine when security violations have occurred.
- B.** It supplies predefined security policies that enable declarative security and management definition.
- C.** It enables you to externalize web services security from the applications you build.
- D.** Use security and management events, captured by OWSM agents, are displayed using Oracle BAM.
- E.** It manages policies in a distributed policy manager that serves as a single policy enforcement point.

Answer: D,E

Explanation:

Note:

*Oracle WSM allows companies to (1) centrally define and store declarative policies applied to the multiple web services making up a SOA infrastructure, (2) locally enforce security and management policies through configurable agents, and (3) monitor runtime security events such as failed authentication or authorization.

*Oracle Web Services Manager offers a comprehensive and easy-to-use solution for policy management and security of service infrastructure. It provides visibility and control of the policies through a centralized administration interface offered by Oracle Enterprise Manager.
