The exhibit shows that users are not required to sign-in and that email invitations have been sent. This is known as guest sharing where the users will have been sent a guest link to the document. To change the access to the document, we first need to disable the guest access to the document by deleting the guest link. Then we can reconfigure the shared access to the document. You can revoke access to a document that has been shared through a guest link by disabling the link. When people outside your organization attempt to access the content using the guest link, they will see a message indicating that they cannot access it. Now that we have deleted the original guest link that provides Edit permission to the document, we can create a new guest link to provide View only access to the document.
