**NEW QUESTION: 1**

Scenario:

Currently, many users are experiencing problems using their AnyConnect NAM supplicant to login to the network. The IT desktop support staff have already examined and verified the AnyConnect NAM configuration is correct.

In this simulation, you are tasked to examine the various ISE GUI screens to determine the ISE current configurations to help isolate the problems. Based on the current ISE configurations, you will need to answer three multiple choice questions.

To access the ISE GUI, click on the ISE icon in the topology diagram to access the ISE GUI.

Not all the ISE GUI screens are operational in this simulation and some of the ISE GUI operations have been reduced in this simulation.

Not all the links on each of the ISE GUI screens work, if some of the links are not working on a screen, click Home to go back to the Home page first. From the Home page, you can access all the required screens.

To view some larger GUI screens, use the simulation window scroll bars. Some of the larger GUI screens only show partially but will include all information required to complete this simulation.

Which two of the following statements are correct? (Choose two.)

- A. The ISE is not able to successfully connect to the hq-srv.secure-x.local AD server.
