NEW QUESTION: 2

Sam is the project manager of the NQQ project. He and the project team have completed the stakeholder identification process for his project. What is the main output of the identify stakeholders process?

- A. Communications management plan
- B. Requirements
- C. Stakeholder register
- D. Stakeholder management strategy

Answer: C

Explanation:

Explanation/Reference:

Explanation:

According to the PMBOK, the main output of the identify stakeholders process is the stakeholder register.

The stakeholder register is a project management document that contains a list of the stakeholders associated with the project. It assesses how they are involved in the project and identifies what role they play in the organization. The information in this document can be very perceptive and is meant for limited exchange only. It also contains relevant information about the stakeholders, such as their requirements, expectations, and influence on the project.

Incorrect Answers:

A: The communications management plan is an output of communications planning.

C: Requirements are not an output of the stakeholder identification process.

D: The stakeholder management strategy is an output of stakeholder identification, but it is not the main output.

NEW QUESTION: 3

Which statement about an attack surface is true?

- A. It is the sum of all paths for data/commands into and out of the application
- B. It is an exploitable weakness in a system or its design
- C. It is the individuals who perform an attack

D. It is any potential danger to an asset

Answer: D
