In addition, 300-430 training materials are high quality and accuracy, since we have a professional team to collect the latest information of the exam, All we want you to know is that long-time study isn't a necessity, Valid 300-430 Exam Camp Pdf but learning with high quality and high efficient is the key method to pass the CCNP Enterprise Implementing Cisco Enterprise Wireless Networks exam.

NEW QUESTION: 1

An ArcGIS Pro user spends 6 months performing analysis on a project The user must send the project to the cartographer to complete the final map layouts The cartographer does NOT have access to all data storage locations that were used for the project.

Which file format allows the user to send the completed project to the cartographer?

- A. pagx
- B. lpkx
- C. ppkx
- D. aprx

Answer: D

NEW QUESTION: 2

- A. No

B. Yes

Answer: A

Explanation:

Topic 5, Contoso, Ltd (C)

Background

Contoso, Ltd. develops, manufactures, and sells paint, wallpaper, and other home improvement items. The company currently uses a third-party service that sells Contoso's products through their e-commerce solution.

Contoso plans to take over the entire process. Customers complete the purchase process and provide billing information to the web application. An executable named SalesProcess.exe processes all of the information received. An on-premises server that runs Windows Server 2012 hosts the executable.

Build and Deploy

You create an Azure Web App using the Azure Management Portal, and configure the Web App to use the Basic App Service plan. The Web App will support the full process of browsing inventory, placing orders, billing, and order fulfillment. Contoso registers the custom domain www.contoso.com for use by the application.

For future production builds, Contoso plans to use Microsoft Visual Studio Team Services and configure Azure continuous deployment. Contoso currently uses Team Foundation Server 2013 for source control.

Performance and Monitoring

Contoso runs performance tests and identifies some concerns. During periods of heavy load, the cache is performing poorly and messages are not processed.

You enable diagnostics for the Web App, but diagnostics data is not logged to storage. You confirm that sufficient storage and permissions are present. You have a device named PC1 that runs Windows 10. PC1 is a dedicated device for debugging the cloud service.

Business requirements

You identify the following business requirements:

The web application must provide a secure shopping experience for the customer.

- * Quality Assurance testers must validate all new versions of the web application before they are

- * published to production.

You must be able to revert to previous versions after deployment if necessary.

- * The solution must eventually reside completely in the cloud.

- * You must enable remote debugging for the web application

- * You must test the solution with a limited number of users for the first six-month period after you initially deploy the web application. During this period, you must minimize costs associated with the Azure subscription.

Technical requirements

You identify the following technical requirements:

Network traffic must be monitored on all ports that the web application uses.

- * The web application must remain available to users during deployment of new features.
- * The custom domain must be secured by using SSL.
- * You must use an X.509 certificate.
- * The web application must auto-scale to a larger instance size when CPU load reaches 50 percent
- * Web App details

You configure the following properties for the Web App:
Resource Group: contoso

- * Web App Name: contosoapp
- * Slot Name: contosol
- * Deployment package location: C:\
- * Deployment package name: contosoweb.zip
- * *

NEW QUESTION: 3

How should you configure Azure AD Connect? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION: 4

- A. Option D
- B. Option C
- C. Option B
- D. Option A

Answer: B
