An ambitious person will always keep on the pace of world, Buolkab provides the most updated and accurate H14-211\_V1.0 study pdf for clearing your actual test, Validity & reliable H14-211\_V1.0 practice dumps guarantee success.

It will help you pass your H14-211\_V1.0 exam in shortest time, It contains the latest H14-211\_V1.0 questions and answers, i wanted to do Huawei-certification certification.

#### **NEW QUESTION: 1**

Case Study 1 - Litware inc

Existing Environment

Current Business Model

The Los Angeles office has 500 developers. The developers work flexible hours ranging from 11:00 to 22:00. Litware has a Microsoft System Center 2012 R2 Configuration Manager deployment.

During discovery, the company discovers a process where users are emailing bank account information of its customers to

internal and external recipients.

#### Current Environment

The network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The functional level of the forest and the domain is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2.

Litware has the computers shown in the following table.

The development department uses projects in Azure DevOps to build applications. Most of the employees in the sales department are contractors. Each contractor is assigned a computer that runs Windows 10. At the end of each contract, the computer is assigned to different contractor.

Currently, the computers are re-provisioned manually by the IT department.

#### Problem Statements

Litware identifies the following issues on the network:

- Employees in the Los Angeles office report slow Internet performance when updates are downloading. The employees also report that the updates frequently consume considerable resources when they are installed. The Update settings are configured as shown in the Updates exhibit. (Click the Updates button.)

- Management suspects that the source code for the proprietary applications in Azure DevOps is being shared externally.

- Re-provisioning the sales department computers is too time consuming.

#### Requirements

##### Business Goals

Litware plans to transition to co-management for all the company-owned Windows 10 computers.

Whenever possible, Litware wants to minimize hardware and software costs.

##### Device Management Requirements

Litware identifies the following device management requirements:

- Prevent the sales department employees from forwarding email that contains bank account information.

- Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.

- Prevent employees in the research department from copying patented information from trusted applications to untrusted applications.

##### Technical Requirements

Litware identifies the following technical requirements for the planned deployment:

- Re-provision the sales department computers by using Windows AutoPilot.

- Ensure that the projects in Azure DevOps can be accessed from the corporate network only.

- Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days.

- Ensure that the company name and logo appears during the Out

of Box Experience (OOBE) when using Windows AutoPilot.

What should you configure to meet the technical requirements for the Azure AD-joined computers?

- A. A password policy from the Microsoft Office 365 portal.
- B. The Accounts options in an endpoint protection profile.
- C. The Password Policy settings in a Group Policy object (GPO).
- D. Windows Hello for Business from the Microsoft Intune blade in the Azure portal.

**Answer: D**

Explanation:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-inorganization>

### NEW QUESTION: 2

What documents can be found in the goods issue process?

There are 3 correct answers to this question.

Response:

- A. Outbound delivery
- B. Billing document
- C. Production order
- D. Sales order
- E. Transfer order

**Answer: A,B,D**

### NEW QUESTION: 3

An integration developer needs to use the JMS Header Setter mediation primitive in the mediation flow logic. The mode of Header Setter primitive is set to Modify. While executing the flow, what is the behavior observed by the integration developer? If the header is:

- A. found, the runtime will copy the header to another location to save the old values, and create a new header with the propagated values.
- B. not found, a new header is created by the runtime.
- C. not found, a runtime exception is thrown.
- D. found, the runtime will recreate the header with the propagated values.

**Answer: B**

### NEW QUESTION: 4
