braindumps will never let you down, now I would like to introduce some details about our Community-Cloud-Consultant quiz torrent: Salesforce Certified Community Cloud Consultant for your reference.

NEW QUESTION: 1

Which product is considered to be of highest money laundering risk?

- A. International wire transfers
- B. Credit cards
- C. Time deposit accounts
- D. Savings accounts

Answer: A

NEW QUESTION: 2

Sie müssen ein Azure-Speicherkonto erstellen, das die folgenden Anforderungen erfüllt:

- * Minimiert die Kosten
- * Unterstützt Hot-, Cool- und Archive-Blob-Schichten
- * Bietet Fehlertoleranz, wenn die Azure-Region, in der sich das Konto befindet, von einem Notfall betroffen ist. Wie sollten Sie den Befehl ausführen? Wählen Sie zum Beantworten die entsprechenden Optionen im Antwortbereich aus.

HINWEIS: Jede richtige Auswahl ist einen Punkt wert

Answer:

Explanation:

Explanation:

Box 1: StorageV2

You may only tier your object storage data to hot, cool, or archive in Blob storage and General Purpose v2 (GPv2) accounts. General Purpose v1 (GPv1) accounts do not support tiering. General-purpose v2 accounts deliver the lowest per-gigabyte capacity prices for Azure Storage, as well as industry-competitive transaction prices.

Box 2: Standard_GRS

Geo-redundant storage (GRS): Cross-regional replication to protect against region-wide unavailability.

Incorrect Answers:

Locally-redundant storage (LRS): A simple, low-cost replication strategy. Data is replicated within a single storage scale unit.

Read-access geo-redundant storage (RA-GRS): Cross-regional replication with read access to the replica. RA-GRS provides read-only access to the data in the secondary location, in addition to geo-replication across two regions, but is more expensive compared to GRS.
