#### **NEW QUESTION: 1**

You are working with a customer who needs to attach an Oracle Cloud Infrastructure (OCI) block volume to a VM instance with read/write access type. The customer wants to know if the

number of IOPS and throughput performance differs between the following two choices:

\* Option A: attach a single 1 TB block volume to the VM instance

\* Option B: attach two separate 500 GB block volumes in a RAID 0 array configuration to the VM instance. You can assume that the customer is using iSCSI attachment type to attach the volumes to the instance. In addition, you can assume 1 MB block size for throughput and 4 KB block size for IOPS consideration. How should you respond to the customer?

- A. Option A provides better IOPS, but lower throughput performance.
- B. Option B provides better IOPS and throughput performance.
- C. Both options provide the same number of IOPS and throughput performance.
- D. Option B provides higher level of throughput, but lower level of IOPS performance.

**Answer: C**

**NEW QUESTION: 2**
