NEW QUESTION: 2

Which SIP request method enables reliability of SIP lxx response types?

A. OPTIONS

B. PRACK

C. ACK

D. REGISTER

E. CANCEL

Answer: B

Explanation:

In order to achieve reliability for provisional responses, we do nearly the same thing.

Reliable provisional responses are retransmitted by the TU with an exponential backoff.

Those retransmissions cease when a PRACK message is received.

The PRACK request plays the same role as ACK, but for provisional responses.

There is an important difference, however. PRACK is a normal SIP message, like BYE.
