NEW QUESTION: 1

A company implements Dynamics 365 Finance. The company wants to automate some standard business practices and processes into the system.

A sales representative calls on a new customer and obtains an order. As part of the process, the representative must follow the standard procedure for onboarding a new customer by uploading the customer's credit application to the company OneDrive for processing, create the new customer record, set a default minimum credit limit, and enter the new order using the company's streamlined new-customer form.

After the credit application is approved by the finance manager, and the customer's credit limit is updated in the system, the order will be released for fulfilment.

You need to determine which tool or functionality best fits the scenario.

Which feature or functionality should you use? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 2

An EMC Data Domain customer is evaluating new backup software and hardware for their environment. Their current environment consists of a single data center along with several remote sites.

Their requirements are:

- Consolidate all backup hardware into their primary data center while still being able to perform remote backups.
- Continue to perform backups directly to tape for certain applications in order to send the tapes offsite for long-term retention.
- Keep their current Data Domain system as part of any new configuration.
- Optimize network performance without adding more hardware infrastructure.
- Manage the entire solution from a single unified interface.

Which solution addresses these requirements?

- A.** NetWorker with Data Domain VTL and an integrated Avamar system
- B.** Avamar with an integrated Data Domain system
- C.** NetWorker with Data Domain Boost and storage nodes at the remote sites
- D.** NetWorker with Data Domain Boost only

Answer: D

NEW QUESTION: 3

A security breach has occurred in an information system that also holds personal data. According to the GDPR, what is the very first thing the controller must do?

- A.** Report the breach immediately to all data subjects and the relevant supervisory authority
- B.** Assess whether personal data of a sensitive nature has or may have been unlawfully processed
- C.** Assess the risk of adverse effects to the data subjects using a data protection impact assessment (DPIA)
- D.** Ascertain whether the breach may have resulted in loss or unlawful processing of personal data

Answer: D

Explanation:

Ascertain whether the breach may have resulted in loss or unlawful processing of personal data: Correct. The very first thing that needs to be done is ascertain that the security incident is in fact a personal data breach. (Literature: A,

Chapter 5) Assess the risk of adverse effects to the data subjects using a data protection impact assessment (DPIA): Incorrect. A DPIA is conducted when designing personal data processing operations. It is not a part of the procedure for a data breach.

Assess whether personal data of a sensitive nature has or may have been unlawfully processed. Incorrect. This is the next step if the incident proves to be a personal data breach - ascertain what type of data breach.

Report the breach immediately to all data subjects and the relevant supervisory authority. Incorrect. Whether the data breach needs to be reported and to whom depends on whether it is a data breach and if so, the type of data breach.
