NEW QUESTION: 1

A client requests a new dynamic address and receives a response from two DHCP servers. Which of the following addressing information would the client use?
A. The IP addressing information from the highest server MAC address
B. The IP addressing information from the highest server IP address
C. The IP addressing information received last
D. The IP addressing information received first
Answer: D

NEW QUESTION: 2
You have a server named Server1 that has Exchange Server 2013 installed.
Users access their mailbox by using Microsoft Outlook 2010 and Outlook Web App.
You need to identify when a mailbox is accessed by someone other than the owner of the mailbox.
Which two actions should you perform? Each correct answer presents part of the solution.
A. Enable audit logging for all mailboxes.
B. Export the administrator audit log.
C. Review the security event log.
D. Run an administrator role group report.
E. Run a non-owner mailbox access report.
Answer: A,E
Explanation:
You have to enable mailbox audit logging for each mailbox that you want to run a non-owner mailbox access report.
The Non-Owner Mailbox Access Report in the Exchange Administration Center (EAC) lists the mailboxes that have been accessed by someone other than the person who owns the mailbox.
When a mailbox is accessed by a non-owner, Microsoft Exchange logs information about this action in a mailbox audit log that's stored as an email message in a hidden folder in the mailbox being audited. Entries from this log are displayed as search results and include a list of mailboxes accessed by a non-owner, who accessed the mailbox and when, the actions performed by the non-owner, and whether the action was successful.

NEW QUESTION: 3
Which of the following laser printer components will flip the paper to allow for printing on both sides?
A. Paper pickup assembly
B. Duplex assembly

C. Paper registration assembly
D. Image transfer belt
Answer: B

NEW QUESTION: 4
During Business Blueprint, the customer indicated they want to run perpetual inventory with moving
average valuation method.
They went into production a week ago and they now want some existing products to use standard cost
valuation instead. How can this be accomplished?
Please choose the correct answer.
Response:
A. As long as there are no open transactions and there is no inventory for the item, they can change the
valuation method.
B. The moving average valuation method is only a default, and can be changed to standard cost for an
item at any time.
C. They can move the items to an item group with the standard cost valuation method. This automatically
changes the valuation method.
D. Once an item has been imported into SAP Business One, the valuation method is fixed and the items
must be deleted and re-imported to change the method.
Answer: A
