Explanation:

Explanation/Reference:

Explanation:

Windows Firewall with Advanced Security is an important part of a layered security model.

By providing host-based, two-way network traffic filtering for a computer, Windows Firewall with Advanced Security blocks unauthorized network traffic flowing into or out of the local computer. Windows Firewall with Advanced Security also works with Network Awareness so that it can apply security settings appropriate to the types of networks to which the computer is connected. Windows Firewall and Internet Protocol Security (IPsec) configuration settings are integrated into a single Microsoft Management Console (MMC) named important part of your network's Windows Firewall with Advanced Security, so Windows Firewall is also an isolation strategy.
