- B. Created an exposure to the USD
- C. Switched a USD asset temporarily into CHF without taking currency risk
- D. Created an exposure to the CHF

Answer: A

NEW QUESTION: 2

Amazon CloudFront is a content delivery network (CDN) service that accelerates the distribution of your static and dynamic content. It is designed to deliver content to end users with low latency and high transfer speeds. Amazon CloudFront is a managed service that integrates with Amazon S3, Amazon EC2, and other AWS services. It is available in multiple regions and is highly available and scalable. Amazon CloudFront is a pay-as-you-go service that charges based on the amount of data transferred and the number of requests served. It is a highly reliable and secure service that is designed to protect your content from unauthorized access and tampering. Amazon CloudFront is a highly flexible and customizable service that allows you to configure a wide range of options to meet your specific needs. It is a highly efficient and cost-effective service that is designed to help you reach your global audience with ease. Amazon CloudFront is a highly secure and reliable service that is designed to protect your content from unauthorized access and tampering. Amazon CloudFront is a highly flexible and customizable service that allows you to configure a wide range of options to meet your specific needs. It is a highly efficient and cost-effective service that is designed to help you reach your global audience with ease.

A. CloudFront is a content delivery network (CDN) service that accelerates the distribution of your static and dynamic content. It is designed to deliver content to end users with low latency and high transfer speeds. Amazon CloudFront is a managed service that integrates with Amazon S3, Amazon EC2, and other AWS services. It is available in multiple regions and is highly available and scalable. Amazon CloudFront is a pay-as-you-go service that charges based on the amount of data transferred and the number of requests served. It is a highly reliable and secure service that is designed to protect your content from unauthorized access and tampering. Amazon CloudFront is a highly flexible and customizable service that allows you to configure a wide range of options to meet your specific needs. It is a highly efficient and cost-effective service that is designed to help you reach your global audience with ease.

B. CloudFront is a content delivery network (CDN) service that accelerates the distribution of your static and dynamic content. It is designed to deliver content to end users with low latency and high transfer speeds. Amazon CloudFront is a managed service that integrates with Amazon S3, Amazon EC2, and other AWS services. It is available in multiple regions and is highly available and scalable. Amazon CloudFront is a pay-as-you-go service that charges based on the amount of data transferred and the number of requests served. It is a highly reliable and secure service that is designed to protect your content from unauthorized access and tampering. Amazon CloudFront is a highly flexible and customizable service that allows you to configure a wide range of options to meet your specific needs.
