NEW QUESTION: 1

After implementing port security, restricting all network traffic into and out of a network, migrating to IPv6, installing NIDS, firewalls, spam and application filters, a security administrator is convinced that the network is secure. The administrator now focuses on securing the hosts on the network, starting with the servers. Which of the following is the MOST complete list of end-point security software the administrator could plan to implement?

- A. Anti-virus/spyware/spam software, as well as a host based IDS, firewall, and strong three-factor authentication.
- B. Anti-malware/virus/spyware/spam software, as well as a host based firewall and strong, two-factor authentication.
- C. Anti-malware/virus/spyware/spam software, as well as a host

based firewall and biometric authentication.

D. Anti-malware/spam software, as well as a host based firewall and strong, three-factor authentication.

Answer: B

NEW QUESTION: 2

Your company has a subscription to Azure. You configure your contoso.com domain to use a private Certificate Authority. You deploy a web site named MyApp by using the Shared (Preview) web hosting plan.

You need to ensure that clients are able to access the MyApp website by using https. What should you do?

A. Use the internal Certificate Authority and ensure that clients download the certificate chain.

B. Back up the Site and import into a new website.

C. Add custom domain SSL support to your current web hosting plan.

D. Change the web hosting plan to Standard

Answer: D

Explanation:

The Basic or the Standard plan is required for SSL support for custom domains.

NEW QUESTION: 3

Dataproc clusters contain many configuration files. To update these files, you will need to use the --properties option. The format for the option is: file_prefix:property=_____.

A. value

B. details

C. null

D. id

Answer: A

Explanation:

Explanation

To make updating files and properties easy, the --properties command uses a special format to specify the configuration file and the property and value within the file that should be updated. The formatting is as follows:

file_prefix:property=value.
