NEW QUESTION: 2

Answer:

Explanation:

Explanation

Topic 3, A: Datum Corporation Overview

Datum Corporation has a single-domain Active Directory forest. The company has the following locations:

Each location has four member servers that run Windows Server 2016 Standard. A Datum Corporation has on-premises deployments of Microsoft SQL Server, SharePoint Server, Exchange Server, and SCCM. The Exchange deployment is configured for hybrid coexistence with Exchange Online. The company plans to retire the on-premises Exchange servers. The on-premises SharePoint deployment will continue to be operated as an Intranet site for A: Datum Corporation employees.

All corporate-owned systems are managed by using SCCM.

Office 365

All departments and projects are represented by Office 365 groups.

You plan to deploy Microsoft Teams with all add-on components disabled. You plan to use Microsoft PowerApps to build custom business apps that can be used across web and mobile environments by the corporate users. Your company publishes several PowerApps templates for use by employees. You plan to deploy Microsoft StaffHub using a default configuration. All add-ons and external features for Teams are disabled.

Requirements:

Office Applications

You identify the following requirements for Office 365 applications and services:

* All users must have the ability to run Office 365 ProPlus.

Only members of the software development team must be able to use Microsoft Access.

- * All department managers must be able to create team sites in SharePoint Online. You must be able to independently configure usage limits for each SharePoint Online site collection.
- * All users must have an Office 365 license to access StaffHub.
- * You must that employees who do not have Teams installed can view conversations by using a different Office application.
- * Employees must be able to create apps from PowerApp templates without the need for administrative intervention.
- * You must configure Office 365 to review all outbound communications from members of the marketing group. All communication reviews will be sent to the legal team.

Users

All user accounts in Office 365 must be created through direct administrative action. Automated account creation is not permitted.

Desktop Management

All BYOD devices must be managed by SCCM using Microsoft Intune. All software installations must be managed by SCCM. All desktop computers must run Windows 10 Enterprise.

Server Distribution

All services must be offered, managed, and configured on servers in the location where the activity takes place. You must use software that does not require specific licensing whenever possible. AJI software required to support services offered must be installed and tested prior to installing any components of the applications that will use it.

Data Privacy

Customer data

Information about customers and this information must be protected. You must prevent customer id numbers, account numbers and phone numbers from inclusion in SharePoint site content. You must ensure that employees can include this information in emails.

Skype for Business Online

Skype for Business Online must only show an employees presence status to others in the company and people the user has specifically added to Skype for Business Online.

Employees must be able to send mail and chat with any employees from any company. Employees must be allowed to set up meetings with other employees. They must not be able to hold webinars or other meetings with people outside the organization.

Answer: A

Explanation:

Explanation
If the nested triggers server configuration option is disabled, On change: prevent will not work correctly. Policy-Based Management relies on DDL triggers to detect and roll back DDL operations that do not comply with policies that use this evaluation mode. Removing the Policy-Based Management DDL triggers or disabling nest triggers, will cause this evaluation mode to fail or perform unexpectedly.
