invitations for bids.
Answer: A

NEW QUESTION: 3
A systems administrator receives an advisory email that a
recently discovered exploit is being used in another country
and the financial institutions have ceased operations while
they find a way to respond to the attack. Which of the
following BEST describes where the administrator should look to
find information on the attack to determine if a response must
be prepared for the systems? (Choose two.)
A. Antivirus vendor websites
B. CVE database
C. Hacker forums
D. Company's legal department
E. Bug bounty websites
F. Trade industry association websites
Answer: C,F

NEW QUESTION: 4
Note: This question is part of a series of questions that use
the same or similar answer choices. An answer choice may be
correct for more than one question in the series. Each question
is independent of the other questions in this series.
Information and details provided in a question apply only to
that question.
You have a database that is denormalized. Users make frequent
changes to data in a primary table.
You need to ensure that users cannot change the tables
directly, and that changes made to the primary table also
update any related tables.
What should you implement?
A. a table-valued function
B. the TRY_PARSE function
C. the TRY_CONVERT function
D. a view
E. the ISNULL function
F. a stored procedure
G. a scalar function
H. the COALESCE function
Answer: D
Explanation:
Explanation
Using an Indexed View would allow you to keep your base data in
properly normalized tables and maintain data-integrity while
giving you the denormalized "view" of that data.
