**Answer: B,C**

**NEW QUESTION: 2**

The bright coloration of American coot chicks is an anomaly: although colorful plumage is usually \_\_\_ to newborn birds because it may attract predators, among this species it appears to be \_\_\_, because parents are more likely to notice and care for brightly-colored offspring.

- A. dangerous . . unnecessary
- B. pernicious . . fatal
- C. detrimental . . helpful
- D. deleterious . . favorable
- E. beneficial . . advantageous

**Answer: C**

Explanation:

The words "anomaly" and "although" both suggest that the second half of the sentence is built around a contrast between the role colorful plumage usually plays among birds and the role it actually plays in this particular species. Thus, the two words we want must be nearly opposite in meaning, as the two words in choice E. are.

**NEW QUESTION: 3**

A Datum plans to implement the VDI. You need to recommend a solution to ensure that the sales office users can access their corporate desktop from a company-owned iPad. The solution must be the most cost-effective solution today and must ensure that the company meets the licensing requirements of the planned IT strategy. Which two licenses should you include in the recommendation? Each correct answer presents part of the solution.

- A. An RDS User CAL for each sales office user
- B. A Windows Companion Subscription (CSL) license for each primary device
- C. A Windows Virtual Desktop Access (VDA) license for each tablet
- D. A Windows 8.1 Enterprise Upgrade license for each tablet

**Answer: A,C**

Explanation:

A: VDA licensing is the recommended license for VDI access devices that do not qualify for SA. VDA provides organizations with the ability to license Windows for use via devices that do not traditionally come with a Windows license, such as thin clients, smartphones, and tablet devices. Organizations can also use VDA to license devices that the organization does not own, such as employees' home PCs and contractor devices.

D: The RDS CAL is the primary license for Microsoft VDI. It offers the flexibility to deploy both VDI and RDS Session Virtualization so that you can provide access to full desktop and shared desktop experiences. You must purchase one RDS

CAL for each device or user that accesses VDI. A

\* Scenario: A Datum plans to implement a Virtual Desktop Infrastructure (VDI) by using Remote Desktop Services (RDS) on Windows Server 2012 R2. In line with the VDI implementation, all of the sales office users will be issued a tablet. A

Datum wants to enable the users to work from their home computer as well, as the need arises. In addition, the company plans to enable a Bring Your Own Device (BYOD) strategy.
