check out the sites that give you the Cisco certification list and details for each certification, Not only do we offer free demo services before purchase, we also provide three learning modes of 500-220 learning guide for users.

NEW QUESTION: 1

Service A's logic has been implemented using managed code. An attacker sends an XML bomb to Service A.

As a result, Service A's memory consumption started increasing at an alarming rate and then decreased back to normal. The service was not affected by this attack and quickly recovered. Which of the following attacks were potentially avoided?

- A. XML parser attack
- B. Insufficient authorization attack
- C. Denial of service

D. Buffer overrun attack

Answer: A,C

NEW QUESTION: 2

You want to create a fade to white over two video clips. What should you do?

A. Drag the Fade With Color Effect over the end the first clip and select Fade with white. Repeat for the second clip.

B. Drag the Fade with white effect over the end of the first clip. Repeat for the second clip

C. Drag the fade with white effect over both clips.

D. Drag the fade effect over both clips

Answer: B

NEW QUESTION: 3

You have a DHCP server named Server1. Server1 has one network adapter. Server1 is located on a subnet named Subnet1. Server1 has scope named Scope1. Scope1 contains IP addresses for the 192.168.1.0/24 network.

Your company is migrating the IP addresses on Subnet1 to use a network ID of 10.10.0.0/16.

On Server1, you create a scope named Scope2. Scope2 contains IP addresses for the 10.10.0.0/16 network.

You need to ensure that clients on Subnet1 can receive IP addresses from either scope.

What should you create on Server1?

A. A split-scope

B. A multicast scope

C. A scope

D. A superscope

Answer: D

Explanation:

A. Multicasting is the sending of network traffic to a group of endpoints destination hosts. Only those members in the group of endpoints hosts that are listening for the multicast traffic (the multicast group) process the multicast traffic

B. A scope is an administrative grouping of IP addresses for computers on a subnet that use the Dynamic Host Configuration Protocol (DHCP) service. The administrator first creates a scope for each physical subnet and then uses the scope to define the parameters used by clients.

C. A superscope is an administrative feature of Dynamic Host Configuration Protocol (DHCP) servers running Windows Server 2008 that you can create and manage by using the DHCP Microsoft Management Console (MMC) snap-in. By using a superscope, you can group multiple scopes as a single administrative entity.

D. <http://technet.microsoft.com/en-us/library/dd759152.aspx>
