Answer: B

NEW QUESTION: 2

You are developing an ASP.NET MVC web application. You need to create a form that can be used to add new products to the web application. You have the following markup:

Which markup segments should you include in Target 1, Target 2, Target 3 and Target 4 to complete the markup? To answer, drag the appropriate markup segments to the correct targets. Each markup segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

Explanation:

Explanation

Target 1: <form action="/Products/Create" method="post">
The form methods are post and get (not submit).

Target 2:

<td>@Html.TextBox(@Model.ProductName)</td>

The InputExtensions.TextBox method returns a text input element. The TextBox method is designed to make it easy to bind to view data or model data.

Target3: <td>@Html.TextBox(@Model.UnitPrice)</td>

The InputExtensions.TextBox method returns a text input element. The TextBox method is designed to make it easy to bind to view data or model data.

Target 4: <input type="submit" value="Save"/>

The submit attribute, of input type, declares a submit button. The input type attribute does not have a post attribute.

NEW QUESTION: 3

A corporate network routing table contains 624 individual RFC 1918 and public IP prefixes. You have two AWS Direct Connect

connectors. You configure a private virtual interface on both connections to a virtual private gateway. The virtual private gateway is not currently attached to a VPC. Neither BGP session will maintain the Established state on the customer router. The AWS Management Console reports the private virtual interfaces as Down.

What could you do to address the problem so that the AWS Management Console reports the private virtual interface as Available?

- A. Change the BGP advertisements from the corporate network to only be a default route.
- B. Attach the second virtual interface to an alternative virtual private gateway.
- C. Filter the public IP prefixes on the corporate network from the private virtual interface.
- D. Attach the virtual private gateway to a VPC and enable route propagation.

Answer: B
