Most candidates can pass the exam by using the QCOM2021 questions and answers of us just one time, we ensure you that we will give you refund if you canâ€™t pass.

NEW QUESTION: 1

You have been asked to install and configure a new switch in a customer network. Use the console access to the existing and new switches to configure and verify correct device configuration.

You are connecting the New_Switch to the LAN topology; the switch has been partially configured and you need to complete the rest of configuration to enable PC1 communication with PC2. Which of the configuration is correct?

- A. Option A
- B. Option E
- C. Option B
- D. Option D

E. Option C

Answer: D

Explanation:

Explanation

Within any VTP, the VTP domain name must match. So, step one is to find the correct VTP name on the other switches. Logging in to SW1 and using the "show vtp status" command we see this:

So we know that the VTP domain must be CCNP. This leaves only choice D and E.

We also see from the topology diagram that eth 0/0 of the new switch connects to a PC in VLNA 100, so we know that this port must be an access port in VLAN 100, leaving only choice D as correct. Note that the VTP versions supported in this network are 1, 2, 3 so either VTP version 2 or 3 can be configured on the new switch.

NEW QUESTION: 2

A successful information security management program should use which of the following to determine the amount of resources devoted to mitigating exposures?

- A.** Amount of IT budget available
- B.** Risk analysis results
- C.** Penetration test results
- D.** Audit report findings

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Risk analysis results are the most useful and complete source of information for determining the amount of resources to devote to mitigating exposures. Audit report findings may not address all risks and do not address annual loss frequency. Penetration test results provide only a limited view of exposures, while the IT budget is not tied to the exposures faced by the organization.

NEW QUESTION: 3

Refer to the exhibit.

Which command was used to generate this output?

- A.** /nas/sbin/modemtst
- B.** /nas/sbin/connectemc
- C.** nas_emailuser
- D.** /nas/sbin/nas_connecthome

Answer: D

NEW QUESTION: 4

On which two objects can a View administrator apply a Tag?
(Choose two.)

- A. Persistent Desktop
- B. Security Servers
- C. Desktop Pools
- D. Connection Servers

Answer: C,D
