NEW QUESTION: 2

What is the main component of Unified MPLS?

A. Multiple IGPs in the network are used, where the loopback IP addresses of the PE routers are aggregated on the area border routers.

B. Confederations are used to provide scalability.

C. The loopback prefixes from one IGP area are redistributed into BGP without changing the next hop.

D. The ABR is a BGP route reflector and sets next-hop to self for all reflected routes.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Since the core and aggregation parts of the network are integrated and end-to-end LSPs are provided, the Unified MPLS solution is also referred to as "Seamless MPLS." New technologies or protocols are not used here, only MPLS, Label Distribution Protocol (LDP), IGP, and BGP. Since you do not want to distribute the loopback prefixes of the PE routers from one part of the network into another part, you need to carry the prefixes in BGP. The Internal Border Gateway Protocol (iBGP) is used in one network, so the next hop address of the prefixes is the loopback prefixes of the PE routers, which is not known by the IGP in the other parts of the network. This means that the next hop address cannot be used to recurse to an IGP prefix. The trick is to make the ABR routers Route Reflectors (RR) and set the next hop to self, even for the reflected iBGP prefixes. In order for this to work, a new knob is needed.

NEW QUESTION: 3

Company Background Corporate Information

Wide World Importers sells and exports products. The main office is located in Dublin and the main shipping office is located in Prague.

The Dublin office has 110 employees and 10 desktops. One hundred of the employees are sales staff.

The Prague office has 90 employees and 50 desktops. Sixty employees in the Prague office share twenty desktops. The other 30 employees have their own desktops. Each sales staff employee has a portable computer.

Existing Environment Existing Licensing Solution

The company purchases all software pre-installed on new computers.

Existing IT Environment

The IT department in Prague is responsible for all technology choices and purchases all hardware. The company uses the following software: Microsoft Windows 2000 Professional
Microsoft Windows XP Professional
Microsoft Windows Server 2008
Microsoft Office Professional 2003

Business Requirements Planned Changes

Wide World Importers plans to implement Terminal Services for its sales staff. The sales staff will access Terminal Services from their portable computers. The company plans to open a new office in Rome. The Rome office will have 20 sales employees.

Business Goals

Wide World Importers has the following business goals:

Standardize software
Minimizes initial software costs
Provide uninterrupted access to e-mail
Reduce spam and increase the availability of e-mail services
Provide all sales staff with training on the latest version of Office at a minimal cost
Provide a licensing solution that is easy to manage
Provide the sales staff with remote access to Office applications by using Terminal Services
Deploy a database solution by using Microsoft SQL Server 2008

Question

You need to identify the purchasing model used by Wide World Importers. Which purchasing model do they currently use?

- A. Decentralized decision-making and centralized purchasing
- B. Decentralized decision-making and decentralized purchasing
- C. Centralized decision-making and centralized purchasing
- D. Centralized decision-making and decentralized purchasing

Answer: C
