%ãf-ã, ¹ã•®ã•çã, 'æ€†å®šã•-ã¾ã•™

Answer: C

NEW QUESTION: 3

You are developing a SQL Server 2008 Reporting Services (SSRS) report for Company.com.

Assembly should be created in order to run real-time lookup and currency conversion.

The assembly has a static class named `Daily` which lives in the namespace `HomeCalc`. There is a method called `DMO` which needs two arguments, `Currnt` and `HomeCalc`. When the report is operating, you should reference the `ToEUR` method in an expression to convert USD to USO.

Which is the correct answer?

- A.** You should use the expression of `= HomeCalc. Daily.USO (Fields! Currnt.Value, "USD")`
- B.** You should use the expression of `=Code! HomeCalc. Daily. USO (Fields! Currnt.Value, " DMO")`
- C.** You should use the expression of `=Code. HomeCalc. Daily. USO (Fields! Currnt.Value, " DMO ")`
- D.** You should use the expression of `= HomeCalc! Daily.USO (Fields! Currnt.Value, "USD")`

Answer: A

Explanation:

A little bit different wording

You work as a database administrator at CertKiller.com. You are in the process of creating a SQL Server 2008 Reporting Services (SSRS) report for CertKiller.com.

NEW QUESTION: 4

Refer to the exhibit.

Which action will resolve the error state of this interface when connecting a host behind a Cisco IP phone?

- A.** Configure multidomain authentication on this interface
- B.** Configure dot1x-port control auto on this interface
- C.** Enable errdisable recovery for security violation errors
- D.** Enable port security on this interface

Answer: A

Explanation:

In single-host mode, a security violation is triggered when more than one device is detected on the data VLAN. In multidomain authentication mode, a security violation is triggered when more than one device is detected on the data or voice VLAN. Here we need that single host mode in being used, not multidomain mode.
