Mock exams are very much similar to the actual SIM-ABA-FEA-101-614 exam and are generally timed for the full 200 questions, Our clients are provided with the 100% money back guarantee with each product to get through their targeted Finite Element Analysis with Abaqus 6.14 Specialist exam.

Free Demos: Buolkab has free demos for almost all of our products [350-801 Reliable Test Testking](#) and all the questions in demos are from the full version of the exams, Inevitably, we will feel too tired if we worked online too long.

NEW QUESTION: 1

A legal search may be made:

- A. With consent
- B. Without a warrant
- C. All of the above
- D. Incident to lawful arrest
- E. For inventory purposes

Answer: C

NEW QUESTION: 2

Which three statements are true about Oracle Clusterware component log files?

- A. The log directory structure is the same on UNIX and Linux systems, but different on Windows platforms.
- B. The consolidated directory structure simplifies diagnostic information collection and assists during data retrieval and problem analysis.
- C. Oracle RAC uses a common unified log directory structure to

store all Oracle Clusterware component log files.

D. The location of the log directory structure is `<Grid_Home>/log/<hostname>`.

E. The Clusterware and Database log files are stored under the same unified directory structure.

Answer: B,C,D

Explanation:

Explanation/Reference:

Explanation:

Oracle Clusterware Main Log Files

Oracle Clusterware uses a unified log directory structure to consolidate the Oracle Clusterware component log files. This consolidated structure simplifies diagnostic information collection and assists during data retrieval and problem analysis.

The slide shows you the main directories used by Oracle Clusterware to store its log files:

CRS logs are in `<Grid_Home>/log/<hostname>/crsd/`. The `crsd.log` file is archived every 10 MB (`crsd.101`, `crsd.102`, ...).

CSS logs are in `Grid_HOME /log/<hostname>/cssd/`. The `cssd.log` file is archived every 20 MB (`cssd.101`, `cssd.102`, ...).

EVM logs are in `<Grid_Home>/log/<hostname>/evmd`.

SRVM (`srvctl`) and OCR (`ocrdump`, `ocrconfig`, `ocrcheck`) logs are in `<Grid_Home>/log/<hostname>/client/` and `$ORACLE_HOME/log/<hostname>/client/`.

Important Oracle Clusterware alerts can be found in `alert<nodename>.log` in the `<Grid_Home>/log/<hostname>` directory.

NEW QUESTION: 4

A customer has requested two custom PCs, one for his family room and one for his home office. The family room PC will be used by all the family members and should be able to play high definition movies and show family pictures. The office PC is used for the customer's architectural design business and should be able to handle the intensive design work and multitasking the customer performs. The office PC must be configured with more power efficient computing than the family room PC.

Instructions: Use the tabs at the top to switch between the PCs. Objects should be placed on the appropriate slot/display areas and can only be used once. All slot/display areas should be filled. Once the simulation is complete select the done button to submit.

Build PCs for the Family Room and Home Office

Answer:

Explanation:

Explanation

Family Room Answer:

Home Office
