Your network contains an Active Directory forest named contoso.com. All servers run Windows Server 2016.

The forest contains 2,000 client computers that run Windows 10. All client computers are deployed from a customized Windows image.

You need to deploy 10 Privileged Access Workstations (PAWs). The solution must ensure that administrators can access several client applications used by all users.

Solution: You deploy 10 physical computers and configure them as virtualization hosts. You configure the operating system on each host as a PAW. You create a guest virtual machine by using the customized Windows image.

Does this meet the goal?

- A. No
- B. Yes
