NEW QUESTION: 1

You use Ceiling > Sketch Ceiling > Boundary Line to create a ceiling manually.

A. False

B. True

Answer: B

NEW QUESTION: 2

Ein neuer Helpdesk-Techniker erhält einen Störungsanruf von einem Benutzer. Das Problem ist etwas, auf das der Techniker noch nie zuvor gestoßen ist, und er weiß nicht, wo er mit der Fehlerbehebung beginnen soll. Die ERSTE Vorgehensweise besteht darin, dass der Techniker:

- A. Teilen Sie dem Kunden mit, dass das Problem an einen übergeordneten Techniker weitergeleitet werden muss.
- B. Bitten Sie den Kunden, etwas Geduld zu haben, während ein erfahrener Techniker zu dem Problem befragt wird.
- C. Fragen Sie den Kunden, ob er nicht länger als zwei Minuten warten möchte, um die Ressourcen zu überprüfen.
- D. Sagen Sie dem Kunden, dass dies das erste Mal ist, dass das Problem auftritt, und seien Sie bitte geduldig.

Answer: C

NEW QUESTION: 3

In the define design options task, which of the following relates to the identify improvement opportunities element?

- A. Assess issues, define risks, confirm elicitation results
- B. Define change strategy, analyze current state, prioritize requirements
- C. Create flow diagrams, purchase solutions components, secure resources
- D. Increase efficiencies, identify additional capabilities, improve access to information

Answer: D

Explanation:

Identify Improvement Opportunities When proposing design options, a number of opportunities to improve the operation of the business may occur and are compared. Some common examples of opportunities include:

Increase Efficiencies: automate or simplify the work people perform by re-engineering or sharing processes, changing responsibilities, or outsourcing. Automation may also increase consistency of behaviour, reducing the likelihood of different stakeholders performing the same function in distinctly different fashions.

Improve Access to Information: provide greater amounts of information to staff who interface directly or indirectly with customers, thereby reducing the need for specialists.

Identify Additional Capabilities: highlight capabilities that have the potential to provide future value and can be supported by the solution. These capabilities may not necessarily be of immediate value to the organization (for example, a software application with features the organization anticipates using in the future).
