While, it seems there still lack IT practitioners [AWS-Security-Specialty Exam Course](#) who are capable of sizing up a project's needs, solving the IT problems.

NEW QUESTION: 1
Your customer asks you about Check Point SmartWorkflow. His company must comply with various laws and regulations and therefore it is important for him to be able to see the changes made to a specific object.
How can the customer receive the required information?
A. The customer can use the Check Point's SmartViewTracker to view the required information. He selects the log category Changed Objects.
B. The customer can use the Record Details. This feature enables administrators to track changes that have been made to objects over an extended period of time. These changes are recorded in SmartView Tracker as audit logs.
C. The customer can check compliance.
This function compares the logs with the compliance requirements and automatically reports which part of the

selected compliance is fulfilled and which is not.
D. The customer can use the Check Point's SmartView Tracker directly to receive the required information. He selects the log category SmartWorkflow.
Answer: B

NEW QUESTION: 2
Sie haben die App Service-Pläne in der folgenden Tabelle gezeigt.

Sie planen, die in der folgenden Tabelle gezeigten Azure-Webanwendungen zu erstellen.

Sie müssen ermitteln, welche App Service-Pläne für die Web-Apps verwendet werden können.
Was solltest du identifizieren? Um zu antworten, wählen Sie die entsprechenden Optionen im Antwortbereich aus.
HINWEIS: Jede richtige Auswahl ist einen Punkt wert.

Answer:
Explanation:

Answer:
Explanation:

Explanation:
Log records: SQL
Social media mentions: Gremlin
You can store the actual graph of followers using Azure Cosmos DB Gremlin API to create vertexes for each user and edges that maintain the "A-follows-B" relationships. With the Gremlin API, you can get the followers of a certain user and create more complex queries to suggest people in common. If you add to the graph the Content Categories that people like or enjoy, you can start weaving experiences that include smart content discovery, suggesting content that those people you follow like, or finding people that you might have much in common with.
