NEW QUESTION: 2

Your customer has asked that all incidents be "scanned" for words that may revolve around product defects and injuries so that they can alert their risk management team of any possible product issues or liability. The customer accepts that 100% accuracy is not attainable, and accepts that they will be false positives and a margin for error.

They have provided you the following words to be "scanned":

- 1 . Mouth
- 2 . Jaw
- 3 . Cheek
- 4 . Jowl
- 5 . Chin
- 6 . Oral
- 7 . Palate

The customer requires the following:

You decide to use a regular expression to search for these words in all incoming emails.

NEW QUESTION: 3

The security administrator has installed a new firewall which implements an implicit DENY policy by default. Click on the firewall and configure it to allow ONLY the following communication.

1. The Accounting workstation can ONLY access the web server on the public network over the default HTTPS port. The accounting workstation should not access other networks.
2. The HR workstation should be restricted to communicate with the Financial server ONLY, over the default SCP port
3. The Admin workstation should ONLY be able to access the servers on the secure network over the default TFTP port.

Instructions: The firewall will process the rules in a top-down manner in order as a first match The port number must be typed in and only one port number can be entered per rule Type ANY

for all ports. The original firewall configuration can be reset at any time by pressing the reset button. Once you have met the simulation requirements, click save and then Done to submit.

Hot Area:

Answer:

Explanation:

Explanation:

Section: Network Security

Implicit deny is the default security stance that says if you aren't specifically granted access or privileges for a resource, you're denied access by default. Rule #1 allows the Accounting workstation to ONLY access the web server on the public network over the default HTTPS port, which is TCP port 443. Rule #2 allows the HR workstation to ONLY communicate with the Financial server over the default SCP port, which is TCP Port 22 Rule #3 & Rule #4 allow the Admin workstation to ONLY access the Financial and Purchasing servers located on the secure network over the default TFTP port, which is Port 69.
