line 11: Type mismatch: cannot convert from char[] to String

line 14: The method println(String) in the type PrintStream is not applicable for the arguments (String, String)

NEW QUESTION: 3

Which two options are valid for the number of bytes in a BGP AS number? (Choose two.)

- A. 6 bytes
- B. 16 bytes
- C. 2 bytes
- D. 4 bytes
- E. 8 bytes

Answer: C,D

Explanation:

During the early time of BGP development and standardization, it was assumed that availability of a 16 bit binary number to identify the Autonomous System (AS) within BGP would have been more than sufficient. The 16 bit AS number, also known as the 2-byte AS number, provides a pool of 65536 unique Autonomous

System numbers. The

IANA manages the available BGP Autonomous System Numbers (ASN) pool, with the assignments being carried out by the Regional Registries.

The current consumption rate of the publicly available AS numbers suggests that the entire public 2-byte ASN pool will be fully depleted. A solution to this depletion is the expansion of the existing 2-byte AS number to a 4-byte AS number, which provides a theoretical 4,294,967,296 unique AS numbers. ARIN has made the following policy changes in conjunction with the adoption of the solution.

The Cisco IOS BGP "4-byte ASN" feature allows BGP to carry a Autonomous System Number (ASN) encoded as a 4-byte entity. The addition of this feature allows an operator to use an expanded 4-byte AS number granted by IANA.

NEW QUESTION: 4

A list report includes columns for purchase requests and regional cost centers. A manager wants the report to show the total number of purchase requests for each of the regional cost centers.

How would you configure the report definition?

- A. Use the purchase requests column to group the cost centers.
- B. Filter the results so that only cost center and purchase requests are included in the report.
- C. Summarize the regional cost centers by count.
- D. Summarize the purchase requests column by count.

Answer: A
