NEW QUESTION: 1

- A. Create Block
- B. Copy Data
- C. Clear Data
- D. Allocate
- E. Aggregate
- F. Clear Block

Answer: A,B,C,E

Explanation:

You can choose from four possible actions to include in a graphical business rule:

Aggregate

Data, Copy Data, Clear Data, and Create Blocks.

Note:

*Aggregate Data -Use to calculate your database by specifying which dimensions to calculate and what calculation options you want to use during the aggregation.

*Copy Data-Use to copy data from one part of your database to another. You select the source data to copy and then specify the target or destination value.

*Clear Data-Use to define a subset of data that will be cleared from the database before a new value is added. You can choose either to clear cells or to clear blocks of data.

*Create Blocks-Use to specify a data slice to ensure that blocks are created for all sparse member combinations in that slice.

NEW QUESTION: 2

What type of doclet is excluded from the review and signoff phases?

- A. Reference
- B. package
- C. Supplemental
- D. Style Sample
- E. Author

Answer: C

Explanation:

Explanation

Supplemental documents such as procedures, instructions, reference material, and so on, can be uploaded into a report package as a supplemental doclet. Supplemental documents can be any type of document file (for example, PDF, Excel, Word, and so on). As the content for supplemental doclets is not included within the merged report, these doclets are excluded from the review and sign off processes. The supplemental doclet contents cannot be viewed online, but users can download and use native programs to open the supplemental doclet in the same way that you can work with third party artifacts in the library.

NEW QUESTION: 3

You have just received some room and WiFi access control recommendations from a security consulting company. Click on each building to bring up available security controls. Please implement the following requirements:

The Chief Executive Officer's (CEO) office had multiple redundant security measures installed on the door to the office. Remove unnecessary redundancies to deploy three-factor authentication, while retaining the expensive iris reader.

The Public Cafe has wireless available to customers. You need to secure the WAP with WPA and place a passphrase on the customer receipts.

In the Data Center you need to include authentication from the "something you know" category and take advantage of the existing smartcard reader on the door.

In the Help Desk Office, you need to require single factor authentication through the use of physical tokens given to guests by the receptionist.

The PII Office has redundant security measures in place. You need to eliminate the redundancy while maintaining three-factor authentication and retaining the more expensive controls.

Instructions: The original security controls for each office can be reset at any time by selecting the Reset button. Once you have met the above requirements for each office, select the Save button. When you have completed the entire simulation, please select the Done button to submit. Once the simulation is submitted, please select the Next button to continue.

Answer:

Explanation:

NEW QUESTION: 4

A company provides call center support for corporations world-wide. Each agent in the call center can be assigned to multiple call center customers. All the company's customers use Windows based user interfaces and it has just signed a new customer that uses a Java EE back end and wants a rich interface.

The company is developing a user interface for the new customer with the following requirements:

-Customer service representatives (CSRs) must be able to work with minimal training on the

application. -CSRs must be able to switch between call center systems quickly. -Screens must have a windows look and feel.

-2000 agents spread across four locations must be able to use the system.

Which recommendation would you make to this company about the user interface (UI)?

A. Write the UI using Java Swing and describe using JNLP.

- B. Write the UI using JSPs with embedded script lets.
- C. Write the UI using AJAX, Accessing servlets directly.
- D. Write the UI using JSP and JSTL.

Answer: A
