Explanation:

Explanation/Reference:

Explanation:

13.2 Plan Stakeholder Management

Definition: Stakeholder Management is the process of developing appropriate management strategies to effectively engage stakeholders throughout the project life cycle, based on the analysis of their needs, interests, and potential impact on project success.

Key Benefit: The key benefit of this process is that it provides a clear, actionable plan to interact with project stakeholders to support the project's interests.

Inputs

1. Project management plan
2. Stakeholder register
3. Enterprise environmental factors
4. Organizational process assets

Tools & Techniques

1. Expert judgment
2. Meetings
3. Analytical techniques

Outputs

Stakeholder management plan

Project documents updates

5.2.1.5 Stakeholder Register

Described in Section 13.1.3.1. The stakeholder register is used to identify stakeholders who can provide information on the requirements. The stakeholder register also captures major requirements and main expectations stakeholders may have for the project.

13.1.3.1 Stakeholder Register

The main output of the Identify Stakeholders process is the stakeholder register. This contains all details related to the identified stakeholders including, but not limited to:

Identification information. Name, organizational position, location, role in the project, contact

information;

Assessment information. Major requirements, main expectations, potential influence in the project,

phase in the life cycle with the most interest; and Stakeholder classification. Internal/external, supporter/neutral/resistor, etc.

The stakeholder register should be consulted and updated on a regular basis, as stakeholders may change-or new ones identified-throughout the life cycle of the project.
