#### **NEW QUESTION: 1**

- A. Option C
- B. Option D
- C. Option B
- D. Option A

**Answer: B**

Explanation:

Views and Viewpoints

The Cisco Business Architect will begin to instantiate their understanding of how the customer views and viewpoints relate

to their business architecture. The Cisco Business Architect can articulate how the views and viewpoints relate to identifying new business capabilities and future refinements to the business model. It is important to see things from the viewpoints of others along with your viewpoint. The definitions for views and viewpoints are aligned with TOGAF.

View:

1. A view is the representation of a whole system from the perspective of a related set of concerns.
2. A view is always specific to the architecture for which it is created.

Viewpoint:

1. A viewpoint is the perspective from which the view is taken.
2. Viewpoints are generic and can be stored in libraries for reuse.

#### **NEW QUESTION: 2**

- A. Option C
- B. Option D
- C. Option A
- D. Option B

**Answer: D**

#### **NEW QUESTION: 3**

According to Cisco, which four improvements are the main benefits of the PPDI00 lifecycle approach to network design? (Choose four.)

- A. faster access to applications and services
- B. increased network availability
- C. lower total cost of network ownership
- D. improved business agility
- E. better implementation team engagement
- F. faster ROI

**Answer: A,B,C,D**

Explanation:

Explanation/Reference:

Explanation:

The PPDI00 life cycle provides four main benefits:

- + It improves business agility by establishing business requirements and technology strategies.
- + It increases network availability by producing a sound network design and validating the network operation.
- + It speeds access to applications and services by improving availability, reliability, security, scalability, and performance.
- + It lowers the total cost of ownership by validating technology requirements and planning for infrastructure changes

and resource requirements.
