People pay more and more attention to the protection of information privacy.

NEW QUESTION: 1

Data gathering and evaluation during field work includes:

- A. Interviewing people and examining assets and accounting, and other operational business, and other operational records.
- B. All of these
- C. Observing conditions and operations
- D. Gaining and understanding of the activity, system, or process under review

Answer: B

NEW QUESTION: 2

A company has decided to update their usage policy to allow employees to surf the web unrestricted from their work computers. Which of the following actions should the IT security team implement to help protect the network from

attack as a result of this new policy?

- A. Block port 80 outbound on the company firewall
- B. Add an implicit deny to the core router ACL
- C. Implement MAC filtering on all wireless access points
- D. Install host-based anti-malware software
- E. Require users to utilize two-factor authentication

Answer: D

Explanation:

To protect the computers from employees installing malicious software they download on the internet, anti-malware should be run on all systems.

After a single machine in a company is compromised and is running malicious software (malware), the attacker can then use that single computer to proceed further into the internal network using the compromised host as a pivot point. The malware may have been implemented by an outside attacker or by an inside disgruntled employee.

NEW QUESTION: 3

When two hosts are trying to communicate across a network, how does the host originating the communication determine the hardware address of the host that it wants to "talk" to?

- A. Show Network Address request
- B. Proxy ARP request
- C. Show Hardware Address request
- D. ARP request
- E. RARP request

Answer: D

NEW QUESTION: 4

Scenario:

1. Victim opens the attacker's web site.
2. Attacker sets up a web site which contains interesting and attractive content like 'Do you want to make \$1000 in a day?'.
4
3. Victim clicks to the interesting and attractive content url.
4
4. Attacker creates a transparent 'iframe' in front of the url which victim attempt to click, so victim thinks that he/she clicks to the 'Do you want to make \$1000 in a day?' url but actually he/she clicks to the content or url that exists in the transparent 'iframe' which is setup by the attacker.

What is the name of the attack which is mentioned in the scenario?

- A. Session Fixation
- B. HTML Injection
- C. ClickJacking Attack
- D. HTTP Parameter Pollution

Answer: C
