NEW QUESTION: 3

A. Option D
B. Option C
C. Option B
D. Option A
Answer: D
Explanation:
A user can create a subnet with VPC and launch instances inside
that subnet. If the user has created a public private subnet,
the instances in the public subnet can receive inbound traffic
directly from the Internet, whereas the instances in the
private subnet cannot. If these subnets are
created with Wizard, AWS will create two route tables and
attach to the subnets. The main route
table will have the entry "Destination: 20.0.0.0/24 and Target:
Local", which allows all instances in the VPC to communicate
with each other.

NEW QUESTION: 4
John wants to send letters to invite his fifty friends on his
birthday party. What will he do to ease the task of creating
fifty letters?
A. Use a Quick Style.
B. Use Mail Merge.
C. Use a template.
D. Use building blocks.
Answer: B
Explanation:
Mail Merge is used to quickly create multiple letters, e-mail
messages, mailing labels, envelopes, and a directory. It uses
two files for creating a document. It is used to create a set
of documents, such as letters, in which the information
contained in the letter is the same but the address
of each person is
different. Answer
option A is
incorrect. A template is a tool that is used to create a
standard layout and the look and feel across multiple pages. A

user creates a template when he wants to apply the same layout to multiple pages in a document. When he makes a change in the template, all the pages associated with it are affected and the corresponding change is reflected in all the pages. Answer option B is incorrect. Quick Style is a set of stored formats that are applied all at once anywhere in the document. Rather than choosing different types of formats every time and applying them, a user can create a Quick Style and apply it at other places in the same document or in other documents. Answer option C is incorrect. Building blocks are items that are created by using the Quick Parts tool. These items can be reused in other documents. For example, the logo of a company can be saved as a building block and can be applied when and where needed.
