NEW QUESTION: 1

During a new desktop refresh, all hosts are hardened at the OS level before deployment to comply with policy. Six months later, the company is audited for compliance to regulations. The audit discovers that 40 percent of the desktops do not meet requirements. Which of the following is the MOST likely cause of the noncompliance?

- A. The desktop applications were configured with the default username and password.
- B. The patch management system is causing the devices to be noncompliant after issuing the latest patches.
- C. 40 percent of the devices use full disk encryption.
- D. The devices are being modified and settings are being overridden in production.

Answer: D

Explanation:

The question states that all hosts are hardened at the OS level before deployment. So we know the desktops are fully patched when the users receive them. Six months later, the desktops do not meet the compliance standards. The most likely explanation for this is that the users have changed the settings of the desktops during the six months that they've had them.
