Answer:
Explanation:

Explanation

Box 1: Source
For Copy activity, it requires source and sink linked services
to define the direction of data flow.
Copying between a cloud data source and a data source in
private network: if either source or sink linked service points
to a self-hosted IR, the copy activity is executed on that
self-hosted Integration Runtime.
Box 2: Self-hosted integration runtime
A self-hosted integration runtime can run copy activities
between a cloud data store and a data store in a private
network, and it can dispatch transform activities against
compute resources in an on-premises network or an Azure virtual
network. The installation of a self-hosted integration runtime
needs on an on-premises machine or a virtual machine (VM)
inside a private network.
