NEW QUESTION: 1

How is currency applied where a company is using multi currency?

Answer:

Explanation:

Every user also has a personal currency, which is used as the default currency in his or her own quotas, forecasts (depending on which forecasting version you use), opportunities, quotes, and reports. Users can also create opportunities and enter amounts using other active currencies.

NEW QUESTION: 2

Micha is the project manager for her project. Micha is now ready to complete the scope verification process so that she can move the project into the project closing process. What is the primary purpose of the scope verification process?

- A. Approval that the project has met its objectives
- B. Review of the project performance
- C. Acceptance of the project team's performance
- D. Acceptance of the project deliverables

Answer: D

NEW QUESTION: 3

You have a text item in your form named Object1. You want to create Object2 as an exact duplicate of Object1. You want to be able to change the properties of Object2. However if you change Object1, you do not want Object2 to change.

Which method of reusing Object1 would be best for these requirements?

- A. Copying Object1
- B. Subclassing Object1
- C. Referencing Object1 in a PL/SQL library
- D. Putting Object1 in an Object library
- E. Creating a property class from Object1

Answer: A

Explanation:

Explanation: When you copy an object, a separate, unique version of that object is created in the target module. Any objects owned by the copied object also get copied.

Changes made to a copied object in the source module do not affect the copied object in the target module.

NEW QUESTION: 4

Which of the following is addressed by Kerberos?

- A. Confidentiality and Integrity
- B. Validation and Integrity
- C. Authentication and Availability
- D. Auditability and Integrity

Answer: A

Explanation:

Kerberos addresses the confidentiality and integrity of information. It also addresses primarily authentication but does not directly address availability.
