NEW QUESTION: 2

Identify the three tasks that can be completed through Oracle Page Composer.

- A. Edit the font, color, or size of a page component's text.

- B. Create Object Model extensions.
- C. Create custom fields on predefined pages.
- D. Make a field read-only or required.
- E. Show, hide, or move page components.
- F. Create custom pages.

Answer: A, E, F

Explanation:

B: You can make a page customizable so that users can modify it at runtime, after your application has been deployed.

C: WebCenter applications provide several ways to move content around on a page. In most cases, the easiest way is to drag and drop. You can do this in Oracle Composer (customization) and in page view mode (personalization).

D: Style and Content Style properties provide an opportunity to fine-tune your application look-and-feel at the component level. Style and Content Style properties provide an opportunity to fine-tune your application look-and-feel at the component level.

Note: Use Oracle Composer to change a page layout and to add task flows, portlets, documents, layout components, and other objects to a page. You can also use Oracle Composer to provide values for the properties associated with pages and the objects they contain and to wire pages, task flows, and portlets to each other.
